## RECORD OF NON-APPLICABILITY (RONA) FOR CLEAN AIR ACT CONFORMITY

### Supplemental Environmental Impact Statement for Land Acquisition and Airspace Establishment to Support Large-Scale Marine Air Ground Task Force Live-Fire and Maneuver Training, Marine Corps Air Ground Combat Center, Twentynine Palms, California

#### INTRODUCTION

The U.S. Environmental Protection Agency published Determining Conformity of General Federal Actions to State or Federal Implementation Plans; Final Rule, in the 30 November 1993 Federal Register (40 CFR Parts 6, 51, and 93). The Department of the Navy published Interim Guidance on Compliance with the Clean Air Act (CAA) General Conformity Rule in the Marine Corps Order P5090.2A, Change 3, dated 26 August 2013. These publications provide implementing guidance to document CAA conformity determination requirements.

Federal regulations state that no department, agency, or instrumentality of the federal government shall engage in, support in any way or provide financial assistance for, license to permit, or approve any activity that does not conform to an applicable implementation plan. It is the responsibility of the federal agency to determine whether a federal action conforms to the applicable implementation plan, before the action is taken (40 CFR Part 1 51.850[a]).

The General Conformity Rule applies to Federal actions proposed within areas which are designated as either nonattainment or maintenance areas for a National Ambient Air Quality Standard (NAAQS) for any of the criteria pollutants (i.e., carbon monoxide [CO], ozone [O<sub>3</sub>], sulfur dioxide [SO<sub>2</sub>], nitrogen oxides [NO<sub>x</sub>], suspended particulate matter between 2.5 and 10 microns in diameter [PM<sub>10</sub>] and less than 2.5 microns in diameter [PM<sub>2.5</sub>], and lead [Pb]). Former nonattainment areas that have attained a NAAQS are designated as maintenance areas. Emissions of pollutants for which an area is in attainment are exempt from conformity analyses.

The Proposed Action would occur within the Mojave Desert Air Basin (MDAB) portion of San Bernardino County. The MDAB is a severe-15 O<sub>3</sub> nonattainment area, and is a moderate nonattainment area for PM<sub>10</sub>. The MDAB attains the NAAQS for all other criteria pollutants. Therefore, only project emissions of O<sub>3</sub> (or its precursors, volatile organic compounds [VOCs] and NO<sub>x</sub>), and PM<sub>10</sub> are analyzed for conformity rule applicability.

The annual *de minimis* levels for this region are listed in Table D-1. Federal actions may be exempt from conformity determinations if they do not exceed designated *de minimis* levels (40 CFR Part 1, § 51.853[b]).

**Table D-1. *De minimis* Levels for Criteria Pollutants in the Mojave Desert Air Basin**

Criteria Pollutant	<i>de minimis</i> Level (tons/year)
VOCs	25
NO <sub>x</sub>	25
PM <sub>10</sub>	100

## PROPOSED ACTION

**Action Proponent:** Department of the Navy

**Location:** Marine Corps Air Ground Combat Center (MCAGCC), Twentynine Palms, California

**Proposed Action Name:** Supplemental Environmental Impact Statement (SEIS) for Land Acquisition and Airspace Establishment to Support Large-Scale Marine Air Ground Task Force Live-Fire and Maneuver Training, Marine Corps Air Ground Combat Center, Twentynine Palms, California

**Proposed Action Summary:** The SEIS has been prepared to analyze the potential environmental impacts of a No-Action Alternative and two additional action alternatives addressing different methodologies and locations for implementing a Desert Tortoise Translocation Program in support of Marine Expeditionary Brigade (MEB)-sized training exercises. The No-Action Alternative would implement the 2011 General Translocation Plan considered in the 2012 Final Environmental Impact Statement and the Land Acquisition Biological Opinion. Alternative 1 would implement a March 2016 desert tortoise translocation plan and Alternative 2 would implement the revised translocation plan developed in June 2016. Alternatives 1 and 2 primarily differ from the No-Action Alternative in the size, number, and location of recipient and control areas.

**Air Emissions Summary:** It has been estimated that all construction activities would be completed over the course of 3 months and would begin in fiscal year (FY) 2017. Air emissions would primarily result from the use of vehicles traveling to and from the recipient and control sites and from construction of tortoise exclusion fencing and signage and off-highway vehicle (OHV) barrier fencing. Tortoises would be transported by hand, via truck, or by helicopter to the recipient sites. During operations, vehicles would travel to the recipient sites infrequently to monitor tortoises and repair fencing. Dust suppression methods would continue to be employed as necessary. A portion of the fencing at certain recipient sites would be removed after two years, in FY 2019, and the removal is expected to take approximately 1 month.

Estimated emissions due to implementation of the Proposed Action are shown in Tables D-2, D-3, and D-4. The data presented in these tables represents the estimated emissions with implementation of the No-Action Alternative, Alternative 1, and Alternative 2. Based on the air quality analysis, the maximum estimated emissions would be below conformity *de minimis* threshold levels for the MDAB. Therefore, no significant impact to air quality would occur.

**Table D-2. Total Emissions Resulting from Implementation of the No-Action Alternative**

Emission Source	Emissions (tons/year) VOCs	Emissions (tons/year) NO <sub>x</sub>	Emissions (tons/year) CO	Emissions (tons/year) SO <sub>2</sub>	Emissions (tons/year) PM <sub>10</sub>	Emissions (tons/year) PM <sub>2.5</sub>

**Affected Air Basin:** Mojave Desert Air Basin

**Date RONA Prepared:** December 21, 2016

**RONA Prepared By:** MCAGCC Twentynine Palms with direct support from Cardno

#### **ATTAINMENT AREA STATUS AND EMISSIONS EVALUATION CONCLUSION**

The MDAB is a severe-15 nonattainment area for the 8-hour O<sub>3</sub> NAAQS; VOCs and NO<sub>x</sub> are precursors to the formation of O<sub>3</sub>. The MDAB is also a moderate nonattainment area for PM<sub>10</sub>. Emissions associated with construction and operational activities for the Proposed Action were calculated using the California Emissions Estimation Model, which is the current air quality model for land use projects in California. Emissions were then compared with *de minimis* thresholds for the MDAB.

The Marine Corps concludes that *de minimis* thresholds for applicable criteria pollutants would not be exceeded as a result of implementation of the Proposed Action. The emissions data supporting that conclusion are shown in Tables D-2, D-3, and D-4, which is a summary of the calculations, methodology, and data attached to this RONA. Therefore, the Marine Corps concludes that further formal conformity determination procedures are not required.

**RONA APPROVAL**

To the best of my knowledge, the information presented in this RONA is correct and accurate, and I concur in the finding that the Proposed Action does not require a formal CAA conformity determination.

#### 1.3 User Entered Comments & Non-Default Data

Project Characteristics -

Land Use - Project-specific acreage, desert setting.

Construction Phase - Project-specific construction phases.

Off-road Equipment - Off-highway trucks = pickup truck, water truck; bore/drill rigs = vibrating post driver.

Off-road Equipment - Off-highway trucks = pickup truck, water truck; bore/drill rigs = vibrating post driver.

Off-road Equipment - Off-highway trucks = pickup truck, water truck; bore/drill rigs = gas-powered auger.

Grading - All project acreage will be disturbed during fence installation.

#### 1.3 User Entered Comments & Non-Default Data

Project Characteristics -

Land Use - Project-specific acreage, desert setting.

Construction Phase - Project-specific construction phases.

Off-road Equipment - Off-highway trucks = pickup truck, water truck; bore/drill rigs = vibrating post driver.

Off-road Equipment - Off-highway trucks = pickup truck, water truck; bore/drill rigs = vibrating post driver.

Off-road Equipment - Off-highway trucks = pickup truck, water truck; bore/drill rigs = gas-powered auger.

Grading - All project acreage will be disturbed during fence installation
